

# Get Back on the Fast Track!

## Total Knee or Hip Replacement Surgery with Mako™ Robotics Technology

If joint pain and stiffness are preventing you from being healthy and active, then it might be time to consider hip or knee replacement surgery.

AMITA Health Orthopedics Institute Hinsdale has advanced, minimally invasive, robotic techniques that can give you a natural feeling joint replacement and a shorter recovery time.

### Learn More at a Free Seminar April 4

Join AMITA Health orthopedic surgeons Dr. Robert J. Daley and Dr. Benjamin G. Domb as they discuss how robotic arm-assisted joint replacement can help you or a loved one.

### Benefits of Robotic-Arm assisted surgery

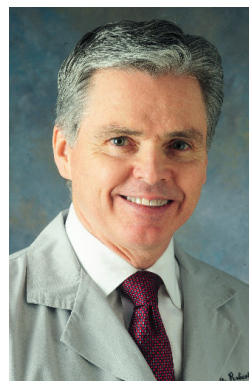

- Mako robotics-assisted surgical techniques allow the surgeon to remove less bone and precisely place joint implants
- Enables the surgeon to personalize the design and execution of the operation based on the patient's individual needs
- Less implant wear and loosening over time
- Smaller incisions, resulting in less scarring
- Shorter hospital stay, faster recover and a quicker return to an active lifestyle compared to traditional joint replacement surgery

### SAVE THE DATE!

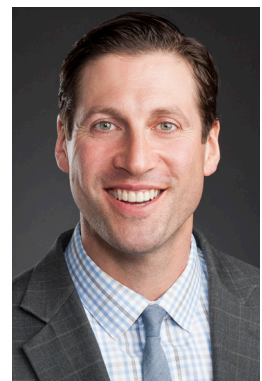

Tuesday, April 4 | 6-7 pm  
Oak Brook Park District  
Central Park West Building  
1500 Forest Gate Road, Oak Brook

**This seminar is free, however registration is recommended.**

Light refreshments and appetizers will be provided.

Speaker:  
Robert J. Daley, MD

Speaker:  
Benjamin G. Domb, MD
